

# Barriers to School Attendance Survey

We're really pleased to be supporting Derbyshire Educational Psychology Service with this important piece of work. They are developing a new resource for parent carers whose children are experiencing barriers to attending school, and they would really value hearing from families with lived experience.

If you have a few minutes, please do share your views using the questionnaire below — your feedback genuinely helps shape the support available to families across Derbyshire. You can find the full details shared by the Derbyshire Educational Psychology Service below.

---

Building on from the Derbyshire Attendance Project and the EBSA toolkit produced for schools, the Derbyshire Educational Psychology Service are now excited to be working in collaboration with Derbyshire Parent Carer Voice to develop a resource for parents and carers who have a child experiencing barriers to education (often referred to as EBSA). As part of this, we are keen to gather a range of parent/carer views on what sort of resource they would find useful.
